THE LUDARIUM · TEACH SHEET

Teach CATAN: Seafarers in ten minutes

3 to 4 (5 to 6 with the extension) players · 60 to 120 minutes · Ages 10 and up

The goal: Reach the scenario's victory point goal on your own turn. Heading for New Shores: 14 VP.

On your turn

1. Roll for production, as in base CATAN.
2. Gold field: 1 resource of your choice per settlement, 2 per city.
3. On a 7 or a Knight, move the robber or the pirate. The pirate steals from a ship on its hex.
4. Trade and build as usual. A ship costs 1 wood and 1 wool.
5. A new ship joins your ship or building, never a road. None on the pirate's hex.
6. Move 1 ship with an open end. Not one you built this turn.
7. Road Building gives 2 roads, 2 ships, or 1 of each.

Three tips for your first game

1. Settle on the coast. Ships can only start from a building or another ship.
2. Count the ships to the next island before you set sail.
3. Park the pirate beside a rival's lead ship to stop their voyage.

Setup

1. Flip the CATAN frame pieces to their plain side. Build the frame shown on the scenario map.
2. Lay out the hexes, number discs, and ports from the 3 or 4 player map.
3. Place the robber and the pirate where the map shows.
4. Each player adds 15 ships to the usual roads, settlements, and cities.
5. Place starting pieces as in base CATAN. A coastal settlement may take a ship instead of a road.
6. Heading for New Shores: both starting settlements go on the main island.

Scoring

- Settlement 1 VP. City 2 VP. Victory Point cards 1 VP each.
- Longest Route: 5 or more connected roads and ships, 2 VP.
- Roads and ships join only at your own building.
- Largest Army: 2 VP, as in base CATAN.
- Heading for New Shores: your first settlement on each small island earns 2 VP tokens.

Game end: The game ends the moment a player reaches the scenario's goal during their own turn. Heading for New Shores: 14 VP.
