THE LUDARIUM · TEACH SHEET

Teach Scythe in ten minutes

1 to 5 players · 90 to 115 minutes · Ages 14 and up

The goal: Have the most coins when someone places their sixth star. Popularity sets what your stars, land, and resources pay.

On your turn

1. Move your action token to a different section of your player mat than last turn.
2. Take its top action, its bottom action, or both, top first. Pay the red cost, gain the green.
3. Move: two units one territory each, or gain $1. Bolster: $1 for 2 power or a combat card.
4. Trade: $1 for 2 resources or 1 popularity. Produce: workers on 2 territories make resources.
5. Bottom row: Upgrade (oil), Deploy a mech (metal), Build (wood), Enlist (food). Take the coins shown.
6. Combat: char or mech meets an enemy char or mech. Dial up to 7 power, add cards. Ties go to the attacker.
7. Encounter: a character entering an encounter token stops, then picks one of three options.

Three tips for your first game

1. Try to take a top and a bottom action every turn. Bottom actions pay coins and build your stars.
2. Keep popularity at 7 or more by the end. Falling below it cuts every payout.
3. Count everyone's stars. When someone has five, the next turn could be the last.

Setup

1. Encounter tokens on the 11 encounter territories. Shuffle the combat, encounter, and objective decks.
2. Deal Factory cards face down, one more than the players. Draw one structure bonus tile.
3. Deal each player a faction mat and a player mat at random. Redraw Rusviet/Industrial or Crimea/Patriotic.
4. Faction mat: set power, draw combat cards, mechs on their spaces, six stars ready.
5. Player mat: set popularity and coins, draw 2 objectives, place cubes, workers, structures, recruits.
6. Character on the home base, one worker on each land territory next to it.
7. Lowest player mat number goes first. Play runs clockwise.

Scoring

- Final coins: coins in hand, plus the three payouts below at your popularity tier.
- Popularity 0 to 6: $3 a star, $2 a territory, $1 per 2 resources.
- Popularity 7 to 12: $4 a star, $3 a territory, $2 per 2 resources.
- Popularity 13 to 18: $5 a star, $4 a territory, $3 per 2 resources.
- The Factory counts as three territories. Add the structure bonus tile's coins.

Game end: The game ends the moment any player places their sixth star. Nobody takes another turn; everyone scores.
