THE LUDARIUM · TEACH SHEET

Teach Twilight Imperium: Fourth Edition in ten minutes

3 to 6 (3 to 8 with Prophecy of Kings) players · 4 to 6 hours, longer while learning · Ages 14 and up

The goal: Be the first to 10 victory points, mostly by scoring public and secret objectives.

On your turn

1. Strategy phase: from the speaker, clockwise, take a strategy card. With 3 or 4 players, take two.
2. Action phase: in initiative order, take one action per turn until everyone passes.
3. Strategic action: use your card's primary. Others may pay a strategy token for its secondary.
4. Tactical action: put a tactic token in a system, move ships in, fight, invade, produce.
5. Component action: use an Action ability on a card or your faction sheet.
6. You cannot pass until you have used your strategy card, or both cards at 3 or 4.
7. Status phase: score, reveal an objective, draw an action card, reclaim tokens, gain 2.
8. Agenda phase, once the custodians are gone: vote on two agendas with planet influence.

Three tips for your first game

1. Read the revealed objectives aloud every status phase. They are the real scoreboard.
2. Spend command tokens like time: every tactical action costs one, and they come back slowly.
3. Teach combat at the first battle, not before. The first round has enough to learn.

Setup

1. Pick a random speaker. Each player takes a faction, a color, and its components.
2. Build the galaxy: Mecatol Rex in the center, home systems in the third ring.
3. Put the custodians token on Mecatol Rex. Shuffle all the common decks.
4. Place the eight strategy cards near the speaker. Set out starting units and technologies.
5. Command tokens: 3 in your tactic pool, 3 in your fleet pool, 2 in your strategy pool.
6. Each player draws 2 secret objectives and keeps 1.
7. Deal 5 stage I and 5 stage II objectives face down. Reveal 2 stage I.

Scoring

- Stage I public objectives score 1 point. Stage II score 2.
- Secret objectives score 1 point. Hold at most 3, scored and unscored.
- Each status phase: at most one public and one secret objective.
- To score public objectives, you must control every planet in your home system.
- Removing the custodians token from Mecatol Rex scores 1 point.
- Imperial strategy card: score a public objective, plus 1 point if you control Mecatol Rex.

Game end: The game ends the moment a player reaches 10 points. It also ends if the speaker must reveal a public objective and none are left: most points wins, ties broken by initiative order.
