THE LUDARIUM · TEACH SHEET

Teach 7 Wonders Duel in ten minutes

2 players · About 30 minutes · Ages 10 and up

The goal: Win at once by military or science supremacy, or have the most points after Age III.

On your turn

1. Take 1 card that no other card covers.
2. Build it: pay its cost and add it to your city.
3. Or sell it: 2 coins plus 1 per yellow card you own.
4. Or tuck it under one of your Wonders and pay the Wonder's cost.
5. Missing resources? Buy from the bank: 2 coins plus 1 per matching symbol your opponent's brown and grey cards show.
6. Flip any face-down card your pick uncovered.
7. Shields move the pawn. Each science pair takes a Progress token.

Three tips for your first game

1. Before you take a card, check what it uncovers.
2. Each brown or grey card also raises your opponent's price.
3. Say the shield gap and both science counts every turn.

Setup

1. Board to one side. Conflict pawn on the middle space, 4 Military tokens face up.
2. Place 5 random Progress tokens face up on the board. Box the rest.
3. Each player takes 7 coins.
4. Draft Wonders: 4 face up, first player takes 1, second takes 2, first takes the last.
5. Deal 4 more; this time the second player picks first. Each player ends with 4.
6. Box 3 unseen cards from each Age. Shuffle 3 random guilds into Age III.
7. Lay out Age I: 20 cards in a pyramid, rows alternating face up and face down.

Scoring

- Pawn's zone: 0, 2, 5, or 10 points to the player it leans toward.
- Points on blue, green, yellow, and purple cards and on Wonders.
- Progress tokens with points. 1 point per full set of 3 coins.

Game end: Instant win on reaching the enemy capital or 6 different science symbols. Otherwise after Age III: most points, then most blue-card points.
