THE LUDARIUM · TEACH SHEET

Teach 7 Wonders in ten minutes

3 to 7 players · About 30 minutes · Ages 10 and up

The goal: Have the most points after three Ages of building your city.

On your turn

1. Everyone picks 1 card from their hand at the same time.
2. Build it, tuck it under your next Wonder stage, or sell it for 3 coins.
3. Missing a resource? Buy it from a neighbor for 2 coins.
4. Pass the rest: left in Ages I and III, right in Age II.
5. Sixth turn: play 1 of your last 2 cards and discard the other.
6. Chains: own the card a symbol points to, and the new card is free.

Three tips for your first game

1. Take resources in Age I; everything later costs them.
2. Watch your neighbors: you trade with them, fight them, and feed them cards.
3. Before passing, check what your next neighbor needs.

Setup

1. Each player takes a random Wonder board, Day side up for a first game.
2. Put 3 coins on each board. Other coins and the Conflict tokens go in the middle.
3. Keep only the Age cards marked for your player count or fewer.
4. Shuffle random guilds into Age III: the number of players plus 2.
5. At the start of each Age, shuffle its deck and deal 7 cards to each player.

Scoring

- Military: beat a neighbor for 1, 3, or 5 by Age; lose for minus 1.
- Coins: 1 point per 3.
- Wonder stages, blue, yellow, and purple cards: as printed.
- Science: each symbol's count squared, plus 7 per set of three different.

Game end: The game ends after the Age III battles. Most points wins; most coins breaks a tie, then players share the win.
